 - 5) Bang,bang,bang
 - 6) Bang and Click
 - 7) Split loot evenly
- 8 Rounds
Uneven split stays

Edgerunner

FEEL

N00B

You can choose your target after all the other players. This card can be revealed in any round before phase 3. You can decide who to aim in phase 3 of this and any follow up rounds, after the others. The N00b has to make their decision before The Solo (if in the game).

Ambidexterity Chip

You can take the gun and Bullet cards from the first person who is out of the game. Reveal this card as soon as a player is out of the game. You get his gun and remaining Bullet cards. You can now play with both guns and 2 decks of cards, one deck for each hand. You play two cards per round and can aim two different players (or the same one with both weapons).

Pain Editor

You can take part of the split even if you withdrew or you were wounded in this round. You can use this power only once. You must reveal this card at the beginning of phase 7, before the loot is split.

Grenade

If somebody shoots at you after you have revealed it, your wound will hurt you so much that you let the grenade fall on the table, and anybody still standing upright will be wounded by its explosion. Reveal this card during one of the first 3 phases of a round. Show everybody that you are holding a grenade! At the end of the phase you get your next wound all the players still standing (i.e. who did not withdraw, or were not wounded yet) also take a wound marker. The round is over since everybody is lying under the table or wounded. You only have one grenade.

The Suit

At the end of the game, each Shame marker grants you \$5,000. Reveal your Power at the end of the game and earn \$5,000 per shame marker you collected!

Smartlink

You can use your Bang, bang, bang card twice in the game. You must reveal this card at the end of the phase where you played your Bang, bang, bang card. Take it back, and throw one of your unused Gun cards instead. Of course you can only apply this once.

Decentralised Heart

You are only killed when you receive your 4th wound.

Reveal your Power when you get your 3rd wound. You're not dead yet, they need to shoot you once more.

Ripperdoc

As a shareholder of Organ Doners Inc, you'll get, at the end of the game, \$10,000 for each killed edgerunner. Reveal your Power at the end of the game. You get \$10,000 for each character killed during the game.

The Solo

You can choose your Gun card at the end of phase 3. This card can be revealed in any round before phase 3. You can choose your gun card at the end of phase 3 when you see who is aiming who. The solo waits until The N00b's decision (if in the game) before making their selection.

Dermal Plating

You never receive more than one wound per round. Reveal this card when you are hit by several bullets in the same round. Until the end of the game, you can only be wounded once per round, regardless of the number of bullets reaching you.
