

Hull Stabiliser

Actions

Repair module

Skill: Engineering

Difficulty: 11

Uses Module: No

Can be done Remotely: No

Energy: None

Can be done more than once per Round: Yes

Notes

Each of these module enables the reroll of one or both dice when checking for hull stability. If a ship takes multiple sources of damage during the same phase (i.e. two missiles hit) then you must make a hull integrity check for each one. [YG 922]

This module has been deprecated in version 1.1 of the rules. It is now a regular sized cargo module that cannot be used cummulatively with other hull stabilizer modules. It has a requisition number of 8 and costs 250 credits. On Ship Layouts replace the Hull Stabilizer module with a Cargo Bay module containing a Battery, an EAME set to Teleporter and a Hull Stabiliser.
