Stardock Omega 31: Map Art Tools

Created by Nytecode

Here is a collection of tools that I use when drawing the modules. If I can do it, just about anyone can since I have about zero artistic talent.

I use the [GIMP](#) drawing program (because it is free as in doesn't cost anything.)

I have some brushes, patterns and scripts to help with some of the drawing that you can download here **Missing** (542KB)

A collection of blank modules to use:
