

Kvonites

Known for their tenacity, respect for life and supreme horsemanship, the goblins are a hardy breed and tend to stay within the Great Plains near the center of the continent rather than venturing forth into other lands. The Kvonite tribes left their mountain homes and went east into what would become the Kingdom of Tursh rather than west into the Great Plains with the rest of their brethren.

Description

Males are short averaging between 4 and 5 feet while the females are easily a foot taller and are much more heavily muscled.

Regardless of gender all Kvonites have a reddishorange complexion, black hair and amber eyes that resemble a cats with a vertical pupil rather than a circular one.
