

Book Creator

The bookcreator plugin allow to select some pages from wiki and export to create a little book PDF or text. It does require cookies enabled on your browser.

The button on the top right of the header for a page “**Select/Deselect Page for Book**” allows you to choose which pages in the Starblazer wiki you want compiled together.

You will see them on this page- [starblazer_adventures_the_book](#)

On the list of selected pages, You can use drag and drop to change the order, save your selection for restore in a second time or share with other users.

You can-

- Reset your selection
- Exclude a page from the selected list
- View the excluded pages and “include” them back
- Create a PDF book of selected pages
- Create a printable version of selected pages
- Extract only text of selected pages
- Drag and drop to change exporting order of page
- Set a title for the PDF document
- Save and restore selections on a specific namespace

This is an upgrade (and replacement for) the plugin that lets you save just one page as a time as a PDF
